Skills

HTML, CSS, JavaScript SAP Node.Js Mongo Db Authentication System

Projects

ZapCart – E-Commerce website

Tech Used: HTML, CSS, JavaScript, Node.js, MongoDB

Developed a fully functional and responsive eCommerce website similar to Amazon/Flipkart.

Supports multiple product categories like electronics, clothing, shoes, accessories, and more.

Features include product search, category filtering, shopping cart, wishlist, order via WhatsApp, and secure login/signup.

Built an admin panel for category management, product uploads, and order tracking using Node.js and MongoDB.

Designed with user-friendly UI/UX and optimized for both desktop and mobile devices.

Automated Trading Bot (Forex/Crypto)

Tech Used: Python, Binance API, TradingView Webhooks

Built a real-time trading bot for forex and crypto trading using Python.

Used TradingView for signal generation and integrated automated order execution via API.

Set custom stop-loss and take-profit levels, including performance analytics and alerts.

ZaykaFast – Online Food Delivery System

Tech Used: HTML, CSS, JavaScript, Node.js, MongoDB, React Native (Mobile App)

Built a complete online food delivery platform similar to Zomato and Swiggy.

Includes customer side website for browsing restaurants, viewing menus, placing orders, and tracking delivery.

Developed restaurant-side dashboard for managing orders, menus, and availability.

Integrated secure admin panel for user management, delivery tracking, and analytics.

Connected backend APIs using Node.js and MongoDB for real-time data updates.

Mobile app version (React Native) for seamless food ordering experience.

Currently live and functioning for local food delivery under the brand "ZaykaFast."
